OVERVIEW

• Aspiring student presently pursuing a B.Tech in Computer Science and Engineering with focus on Cyber Security and Digital Forensics. I have a strong interest in using my technological expertise to create softwares that are both safe and effective. I'm excited to contribute to cutting-edge tech efforts and improve corporate security.

SKILLS

- Technical :-Data Structures and Algorithms (Java), SQL, HTML, Cascading Style Sheets, Power BI, OOPs, Microsoft Excel.
- Non- technical :- Program Management, Leadership, Communication, Decision-making.

PROJECTS

Password Strength Checker   2022 - 2023

- For this project, HTML, CSS, and JavaScript were used to create a web application that would assess and categorize passwords as extremely strong, good, weak, or very weak.
- As the HTML and CSS developer on a four-person team, my job was to create and organize the user interface.
- To provide a user experience that is both intuitive and aesthetically pleasing, I designed the password entry form's HTML layout and applied CSS styling. In order to make it easier for users to understand the feedback on the strength of their password, I also included visual clues like color-coded indicators and strength meters.
- The JavaScript team members handled the dynamic interaction and logic to evaluate the password criteria, guaranteeing thorough functionality and user guidance for making better safe passwords.

Career Guidance Website | TechTrek   2023 - 2024

- As part of this project, a career advising website was created to help users find possibilities, make well-informed decisions, and acquire the skills needed for their desired career pathways. With the help of HTML, CSS, JavaScript, and ReactJS, the website provides thorough help and tailored direction.
- I worked as the logo designer for a team of ten, and my main responsibility was to come up with a distinctive and identifiable logo that perfectly captured the goals and objectives of the website.
- The collaborative effort ensured that the website not only provided valuable career insights, but also delivered a visually appealing and user-friendly interface.

EDUCATION

• Vellore Institute of Technology	Bhopal, MP
B.Tech (CSE with specialization in Cyber Security and Digital Forensics) | GPA: **7.72** / 10	2021 - 2025
• Brahma Shakti Public School, Delhi	
Class XII | Percentage: **74.4%**	Delhi, Delhi 2020 - 2021
• St. Xavier's High School, Gurgaon	
Class X | Percentage: **95.2%**	Gurgaon, Haryana 2018 - 2019

CERTIFICATES

Google Cloud Computing Foundations Certification.

E-Train India -Microsoft Power Platform App Maker

ADDITIONAL DATA

Languages :- English, Hindi

Hobbies :- Travelling, Cooking, Sketching
